Dear Senator:

While workplace violence is a serious and growing problem for all workers, incidents in health care and social services far outpace any other industry. In the last decade, the rate of serious injuries increased by 69 percent. This foreseeable and preventable problem impacts workers, patients, and their loved ones. It also compromises our quality of care.

Workplace violence prevention plans can make a difference. The Occupational Safety and Health Administration must create an enforceable standard so that all workplaces are covered by a plan. Please support the Workplace Violence Prevention for Health Care and Social Service Workers Act (S. 851). This legislation should be passed without delay.

Dear Secretary of Labor:

While workplace violence is a serious and growing problem for all workers, incidents in health care and social services far outpace any other industry. In the last decade, the rate of serious injuries increased by 69 percent. This foreseeable and preventable problem impacts workers, patients, and their loved ones. It also compromises our quality of care.

Workplace violence prevention plans can make a difference. The Occupational Safety and Health Administration needs to create an enforceable standard so that all workplaces are covered by a plan. Please support the goals of the Workplace Violence Prevention for Health Care and Social Service Workers Act (H.R. 1309/S. 851). The Administration can choose to make a meaningful difference in the lives of critical workers and all those impacted by this issue. Please act without delay.
